Operate plant to lay and distribute

Overview

What is this standard about?

This standard specifies the skills, knowledge and understanding required to demonstrate competence in the operation of mobile plant such as a soil stabiliser or motorised scraper to lay and distribute materials within extractives and mineral products settings.

Who is this standard for?

This standard is applicable to any person operating plant to lay and distribute materials.

Performance criteria

You must be able to:

1. conduct your work in line with relevant regulations, legislation and safe working practices to maintain a safe, healthy and environmentally responsible workplace.
2. interpret the given operating **information** relating to the use of plant and confirm its relevance
3. communicate with others and work as part of a team when operating plant to lay and distribute
4. identify the hazards and risks associated with operating the plant
5. select, check and wear the appropriate Personal Protective Equipment (PPE) for the work activity
6. protect the work and surrounding area to prevent damage, maintain a clean workspace and dispose of waste in line with safe working practices
7. identify the work area and the materials to be used for the laying and distribution operation
8. carry out pre-operational checks for obstructions, changes in stability, safety and security of the work and surrounding area
9. check to avoid damage to structures and utility services
10. work within your own level of competence and seek assistance and advice when required
11. operate the plant to lay and distribute materials in accordance with given working instructions to meet the required specification

Knowledge and understanding

You need to know and understand:

1. relevant regulations, legislation, company policies and procedures, safe working practices and operating **information**
2. how to select, check and wear the appropriate PPE for the task
3. how to report problems with the plant, equipment and operating information
4. who to notify when conducting plant operations
5. how to protect the work and surrounding area when operating plant to lay and distribute materials
6. why it is important to take responsibility for your own behaviour and standards of work
7. why you must conduct a pre-operational check of the work and surrounding area
8. how to identify obstructions and changes in stability, safety and security of the work and surrounding area
9. what constitutes unsafe conditions
10. the limits of your own responsibility and competence and when to seek assistance or advice from others
11. how to dispose of waste in line with safe working practices
12. how to carry out the work activity to meet the required specification
13. the importance of adhering to schedules and agreed timeframes
14. the importance of monitoring the condition of plant and equipment

Scope/range

information: drawings or diagrams, specifications, schedules, method statements, risk assessments, manufacturers' information, current regulations governing the operation of plant and the use of equipment

Operate plant to lay and distribute
