

## Reinstate the drilling area of operations and complete works

---

### Overview

#### **What is this standard about?**

This standard states the skills, knowledge and understanding required to demonstrate competence in reinstating the area of operations and completing the drilling work activity. This covers reinstating the ground as appropriate and clearing the site of materials, waste and equipment. During this work account must be taken of the relevant operational requirements and healthy, safe and environmentally responsible working practices.

#### **Who is this standard for?**

This standard is applicable to anyone working with, or supporting the drilling work activity, with the responsibility for reinstating the work area on completion of operations.

Reinstate the drilling area of operations and complete works

---

## Performance criteria

You must be able to:

- 1 establish the reinstatement work required
- 2 select the type, quality and quantity of plant, tools, equipment and resources for the work required
- 3 organise the reinstatement to minimise disruption to other work and damage to the environment
- 4 establish or maintain security arrangements for the work area
- 5 reinstate the ground to agreed specification and time schedules
- 6 dispose of waste
- 7 clear the site on completion of the work
- 8 report to **relevant persons**
- 9 carry out the work in compliance with **approved policies, procedures and practices**

## Reinstate the drilling area of operations and complete works

### Knowledge and understanding

You need to know and understand:

- 1 the types and purpose of information sources on reinstatement
- 2 methods and use of plant, tools or equipment to reinstate the drilling area and complete the work
- 3 the hazards and risks, and environmental aspects associated with reinstating the drilling area and completing the work
- 4 the security arrangements for the reinstatement activities, including tools and equipment security
- 5 the use of personal protective equipment required for, and during reinstatement activities
- 6 the requirements for environment compliance and protection
- 7 the importance of completing the work to specified standards and timescales
- 8 actions to be taken if plant, tools or equipment are damaged, unavailable or unsuitable for the task
- 9 personal responsibilities under the health and safety statutory and environmental requirements
- 10 reporting requirements and arrangements to **relevant persons**
- 11 the types of problems that can occur when reinstating ground, and the actions to be taken
- 12 personal responsibilities for reporting problems to **relevant persons**
- 13 the reasons for leaving the work area clear and tidy
- 14 the reasons for, and methods of waste disposal
- 15 the **approved policies, procedures and practices** for the reinstatement of the drilling work area and completing the work

Reinstate the drilling area of operations and complete works

---

**Scope/range**
