
Overview

What is this standard about?

Achievement of this standard demonstrates your competence in assessing, recommending and supporting safety, health, and environmental improvements. You will be able to carry out assessments, analyse the resulting information, and put forward recommendations for improvements, assisting in the implementation and reviewing any improvements made.

Who is this standard for?

This standard is applicable to anyone at a supervisory or managerial level approved to carry out this function.

Performance criteria

You must be able to:

1. Conduct your work in line with relevant regulation, legislation, and industry best practice
2. Carry out an assessment of safety, health, and environmental systems to identify potential improvements
3. Analyse the assessment information to seek areas for improvements
4. Assess the risks for implementing an improvement plan
5. Present your proposals for improvements to senior staff
6. Assist in implementing any sanctioned improvements
7. Monitor and assess any improvements that were made
8. Communicate the benefits of any improvements to stakeholders

Knowledge and understanding

You need to know and understand:

1. Relevant regulation, legislation, company policies and procedures, and industry best practice
2. What is meant by effective safety, health, and environmental systems
3. The benefits to all of improving safety, health, and environmental aspects
4. The benefits of engaging all stakeholders in the assessment process
5. Methods for successfully communicating the benefits of any improvements to other stakeholders
6. How to review process or procedures to identify areas for potential improvement
7. The process of creating proposals for any improvement(s)
8. How your business will review the proposal(s)
9. The creation of an improvement plan
10. Methodologies for assessing the risks of implementation
11. The factors involved in implementing an improvement plan
12. Techniques for reviewing the improvements made
